Portfolio | LinkedIn | GitHub | LeetCode | GeeksforGeeks

Professional Summary

Computer Science and Engineering undergraduate with a strong foundation in programming, software development, and artificial intelligence. Hands-on experience in building machine learning models, AI-powered applications, and full-stack solutions through internships and projects. Demonstrates strong problem-solving, analytical, teamwork, and leadership skills, with a focus on developing innovative solutions to real-world challenges.

Education

B.Tech in Computer Science and Engineering 2023 – 2027
Velagapudi Ramakrishna Siddhartha Engineering College **CGPA: 9.18/10**

Technical Skills

- **Programming Languages:** Python, Java, C, JavaScript
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **AI & ML:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI
- **Frameworks & Libraries:** scikit-learn, TensorFlow, OpenCV, NumPy, Pandas
- **Web Development & Databases:** HTML, CSS, Node.js, Express.js, REST APIs, PostgreSQL, MySQL
- **Tools & Deployment:** Git, GitHub, Streamlit, Vercel, Render

Projects

QuizMind AI: AI-Powered Quiz Generation Platform GitHub
JavaScript, Node.js, Express.js, PostgreSQL, HTML, CSS, REST APIs, JWT

- Developed an AI-powered full-stack quiz generation platform using Gemini and Grok APIs to create customized quizzes based on subject, difficulty, and question count.
- Built RESTful APIs using Node.js and Express.js, implementing JWT-based authentication, email verification, and password reset functionality.
- Integrated automated quiz scoring, performance analytics, and quiz history using Neon PostgreSQL; deployed the application using Vercel and Render.

SpamShield ML: Intelligent Email Spam Classification System GitHub
Python, Machine Learning, NLP, TF-IDF, scikit-learn, LinearSVC, Streamlit

- Built an email spam classification system using the SpamAssassin dataset to distinguish spam emails from legitimate messages.
- Combined word-level and character-level TF-IDF features with a LinearSVC classifier, achieving 99.72% test accuracy and a 99.56% F1 score.
- Developed an interactive Streamlit application for real-time email classification and deployed it using Streamlit Community Cloud.

Experience

Infosys Springboard: Artificial Intelligence Virtual Internship Oct 2025 – Dec 2025
Project: AI-Driven Cybersecurity Threat Prediction Platform

- Contributed to machine learning model development for automated cybersecurity threat detection and classification.
- Performed cybersecurity dataset research, data preprocessing, model training, and comparative performance evaluation.
- Analyzed classification metrics to identify the best-performing model for potential integration into the threat analysis platform.

Certifications

- **ServiceNow:** Certified System Administrator (CSA), Certified Application Developer (CAD)
- **AWS:** Certified Cloud Practitioner
- **Cisco Networking Academy:** Programming Essentials in Python, Programming Essentials in C, CCNA: Introduction to Networks
- **NPTEL:** Java Programming

Achievements

- Solved 150+ coding problems across various coding platforms.
- Secured 1st place in the SIH 2025 college-level idea presentation among 200+ teams.

Leadership & Extracurricular Activities

- Led collaborative learning and technical presentation activities as Team Lead in the college ELITE Program.
- Led teams in the BOSCH Tinkerers' Lab IIT Hyderabad and D3Code Global Hackathons, coordinating AI project ideation, collaboration, and presentations.
